

Index Based Volatility Driven

VOLSHARES LARGE CAP ETF Declares Quarterly Dividend June 12, 2018

Volshares Large Cap ETF, a public reporting, daily NAV ETF (NYSE: [VSL](#)), announced today that its Board of Directors authorized for each class of common stock a dividend of \$0.0869 per share. The dividend will be payable to stockholders of record as of the close of business on each day during the period from March 13, 2018 to June 12, 2018, prorated for the period of ownership. The dividend reinvestment date will be June 14, 2018 with the payable date being June 14, 2018.

About Volshares Large Cap ETF:

Volshares Large Cap ETF ([VSL](#)). The fund takes a unique approach to building its portfolio by looking for companies that exhibit low volatility characteristics, but also demonstrate price momentum that could deliver above average returns. The fund uses the Whitford Model, which analyzes the market sentiment for each company in the starting universe of the 500 largest companies based on the proximity of each company's opening and closing prices to their mean, and its volatility to identify the most attractive securities in terms of their potential for short-term appreciation relative to their expected volatility.
